RE: Digital Holter Monitor System
DATE: September 24, 1997

Just to let you know about your company's system. We have had it in place for awhile now and it has met all of our expectations and more. Our scanning-processing time is half of what it was with our previous digitized system. Your system is extremely accurate with its analysis. The technologists that utilize your equipment find it to be very user friendly and easy to operate.

I have been involved with holter ambulatory monitoring for twenty-four years and this is the best product that I have seen and used.

Keep up the great work!

*Best regards
Brad Stimak*
