Forest Medical, LLC  
6700 Old Collamer Road  
East Syracuse, NY 13057

To Whom It May Concern:

Over six months ago NFI purchased three holter monitor units from Forest Medical. We are extremely pleased with the performance and overall reports. The software is very user friendly, making it easy to edit and print reports. Additionally, NFI is a mobile service, constantly transporting the holter units and shipping them through the mail. They have been found to be very durable and reliable.

The staff at Forest Medical is friendly, easy to contact and give the highest standard of service when needed. Forest Medical has satisfied all of our needs and has continual upgrades to improve the performance of their holter units. They strive for excellence and you can't ask for more than that.

When purchasing the holters I was a little skeptical, not knowing much about Forest Medical, but let me reassure they are a top notch company and would highly recommend them. If you would like to contact me, please feel free to do so.

Sincerely,

Cliff Bowman, RDCS, RVT  
Director
